

Social Responsibility

We strongly believe that an entities social responsible behavior shows its true prosper and with a goal to serve the nation. We have been supplying the energy products of our entity for educational institutions, hospitals as well and satisfying ourselves by delivering the best of our efforts for protecting the environment. As ecology is the most precious gift of nature we take the preventive measures to avoid contamination and pollution of consumable natural resources and we proudly say that we are contributing our part of effort to the society.

Team - Ourpride

The team of professionally qualified and dedicated personals, committed to Quality with a strong intention to serve the company to produce the best of their efforts to satisfy our clients at large. The inception has transformed SPES as one of the Top Brands in the Energy Solutions Sector. As human relations play a vital role our team maintains a very good amity. We even schedule for field trips and organize entertainment programs for the team and make them feel the company a homely environment.

INSPIRATION

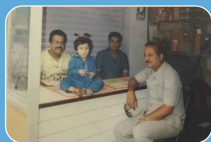

The difference at the Peak Position. We drew our inspiration from Eagle-the king of birds for its high energy, stamina, sharp vision and it's difference in attitude, flying at highest altitudes sometimes above the raining clouds while all other birds hide themselves in their nests.

We dream and strive for the same stamina, vision and altitude to achieve the highest position in the energy solution sector.

OUR JOURNEY

The promoters have started their journey and have tried their research in wide variety of fields in lead and lead oxides.

- 1984 - Begin with a small battery spare parts shop.
- 1986 - Started manufacturing of battery plates and batteries by name LUXMI BATTERIES.
- 1990 - Extended the manufacturing unit with lead and lead oxide.
- 2010 - Raised to SRI PADMAVATI ENERGY SOLUTIONS (India) PVT. LTD.....

VISION

To Partner the Industrial growth of the Nation by providing technologically strong Energy solutions and to be one of the ultimate sources of transforming power generating ideas as Power-Full Products for various needs.

THE RISE

We are standing on the historic site and are proud to introduce ourselves as one of the best Leading Partners in Generation of Energy Products for the future generations. As an ISO 9001(QMS), ISO :14001(EMS) and A.P. Pollution Control Board Certified Company. We have been on the progressive path of providing Reliable Energy Solutions in India since 1984.

The brilliance of Mr. Hiralal Thakral and his son Mr. Umesh Thakral, The Managing body and Promoters with 30 years of Impeccable experience in Manufacturing of Batteries etc., with the Brand name 'LUXMI' and it has pioneered to SPES an energy solutions entity in manufacturing and trading of lead and lead based products and also supply them on Job Work basis (by converting Raw Material provided to us). In a nutshell, we serve as an integrated 'one-stop' destination to our customers, at the most competitive and affordable rates. We have emerged ourselves as a leader in energy solution sector with wide spread network throughout the major states of the country.

MISSION

The Company promises a continuous effort in Expansion of its Research Activities to give the world its best creation and challenging its competitors in the open market Implementations and giving its clients a Quality based Products, Excellent Human Relations and Everlasting Business Prospects.

THE FACTORY

Our factory is strategically located in a far-flung area at a distance of about 65 KM from Hyderabad, with the avowed objective of sustaining the environmental protection. Our factory is in our own premises with a sprawling area of 4.20 acres at present with another 10.00 acres of land being ready for meeting our futuristic plans to expand and diversify.

The New battery recycling plant near Hyderabad, Telangana State which commenced production since April, 2011 has the capacity to produce 12,000 Tonnes of Lead per annum. It has been set up with a capacity to process 24,000 Metric Tonnes of battery scrap per annum and has the most modern infrastructure & state-of-the-art machinery including Rotary Furnace, Refining pots, Overhead cranes, Spectrometer, Battery cutting machines, 100% power backup generator, Air pollution control system, ETP plant etc. apart from the Quality control lab with Spectrometer for 99.97+ purity levels.
